DETAILED ACTION

Drawings

1. The drawings were received on 25 August 2005. These drawings are acceptable.

Allowable Subject Matter

2. Claims 1, 2, 4, and 6-14 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Examiner notes that claim 1 has been amended to include limitations presented earlier in dependent claims 3 and 5 (now canceled), but since claim 5 did not previously depend on claim 3, claim 1 currently presents a new combination of limitations that is not the same as the combinations presented by either the previous claim 3 or the previous claim 5.

Although Examiner respectfully maintains that the grounds of rejection of the earlier claims presented in the previous Office Action were proper, the prior art, including Smith et al. (US 2003/0020977 A1), does not specifically disclose or fairly suggest a method of establishing a service connection between first and second network nodes in a WDM optical network including the combination of all the elements, steps, and limitations now recited in independent claim 1, particularly including receiving, from each network user, user-preferences prioritizing a plurality of decision-criteria defining preferable characteristics of the service connection, wherein the user-preferences rank a plurality of decision-criteria including in-service wavelengths, path length, in-service TRP savings, fragmentation, and utilization rate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
